

Bed Bug ALERT

Bed Bug Monitoring System

The Most Effective Bed Bug Monitoring System

FOR PUBLIC HEALTH & SAFETY & ECOLOGICAL WELL BEING

YOU CONTROL BED BUG MONITORING DAILY

Step 1: Simply insert the business card size Bed Bug Alert between the mattress and box spring in the corners at the head of the bed.

Step 2: Check the BBA daily and discard immediately should it contain a bed bug

Step 3: Notify a pest control company for treatment.

HIDE

BED BUGS ARE:

- Having a physiological impact on consumers
- Creating a negative economic impact in the travel/tourism sector
- Crawling to the head of the bed by the lure of carbon dioxide exhaled during sleep

BENEFITS OF BED BUG ALERT MONITOR:

Peace of Mind - Hotels, motels, hospitals, long-term care facilities, theaters, retail outlets, schools, gyms, restaurants to monitor the environment.

Discreet - While the Bed Bug Alert Monitor is transparent for inspection, it is also invisible for those who don't know it's between the mattress and box spring

Immediate call to action - No need to wait to be bitten, bed bugs are always drawn into the Bed Bug Alert Monitor by environmentally sound bed bug lure; as soon as a bed bug shows up, call your local pest control company.

Effective - Your staff inspect the Bed Bug Alert Monitor, providing daily monitoring program.

Easy Removal - Bed Bug Alert Monitors are replaced as required creating long-term, low cost monitoring program for bed bugs.

Bed Bug ALERT
