

Seal Off Access to Pesky Roosting Birds with

BIRD-X BirdNet

"Standard" (not actual size)

"Structural" (not actual size)

Keep birds out of roosting and nesting areas on your property by sealing off all structural openings and other havens.

BirdNet is a hassle-free sensible choice

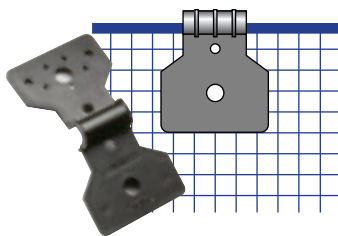

- **NEARLY-INVISIBLE** – won't mar the look of your building
- **PERMANENT SOLUTION** – keep the birds out once and for all
- **EASY INSTALLATION** – lightweight and pliable – and nearly no upkeep
- **UV STABILIZED** – won't deteriorate with age or lose strength when exposed to the elements

Guard against pigeons, starlings, blackbirds, sparrows, gulls and more, even large birds and small animals.

Solve bird problems at your plant, office complex, warehouse, parking lot, sports facility - nearly anywhere - easily and inexpensively. The "net" results are an end to your bird problems! Also protect vineyards, orchards and other crops – the "bird-proof" enclosures will still let all the light and moisture in.

NOTE: ALL bird control methods prove more effective when different types of products are used in combination. Call us to describe your situation and let one of our professionals suggest solutions.

Made in USA

Mounting Clips – Hold BirdNet securely with heavy-duty plastic clips that snap around net. Easy to install on your surface on cord or wire, using screws, nails, adhesive or Velcro®. Case of 250 clips \$ 108

- **Standard BirdNet:** 100' x 14'
- (3/4" black mesh) 200' x 14'
- **Structural BirdNet:** 100' x 14'
- (heavier 1/2" black mesh - recommended for outdoors) 200' x 14'
