

GooseBuster PRO

Sonic Goose Repellent System

Using the same technology in our Original GooseBuster, the GooseBuster PRO addresses the need to keep smaller areas free from geese and their droppings. This unit utilizes one speaker to deliver audio alert and alarm calls that drive geese away.

Get rid of geese with a time tested repeller developed utilizing over 30 years of scientific research in goose vocal communication and behavior. Geese recognize these naturally-recorded wild geese alarm and alert calls and react instinctively:

- 'Alert' and 'alarm' calls signify danger
- Audio makes spaces uninhabitable for geese
- Customizable settings, completely humane
- Covers up to 1.5 acres per unit

Get rid of stubborn Canada Geese with the GooseBuster PRO.

Instructions & Specifications: Use 1 unit to protect up to 1.5 acres of outdoor space from pest geese; 2 units will protect up to 3-5 acres due to amplification. All hardware included.
